Subject: Gulco Marine Split Soil Sample Results - AST Removal Oversight

Gary:

Attached is a copy of the laboratory report EA received this morning for the split soil samples collected during AST removal oversight activities at the Gulfco site. These results are still subject to validation by EA, but I wanted to go ahead and provide you a copy. I have also prepared a simple summary table that compares the results for the soil samples to the Preliminary Screening Values that PBW developed and presented in their 2005 RI/FS Work Plan, and as a reference to sample locations, also attached PBW's map illustrating the former AST configuration.

Please let me know if you have questions or comments concerning this matter.

Thank You,
Mark Paddack
